## SKILLS

### Game development

- Unity, C#
- Multiplayer networking (Mirror)
- AI — behavior trees
- A\* pathfinding
- Data-driven systems (ScriptableObjects)

### Languages & frameworks

- C#, Java, Python, C
- Spring Boot, SQL
- HTML / CSS / PHP, JavaScript

### Tools

- Git / GitHub
- Docker, SonarQube

### Methods

- Agile / SCRUM
- Project management

### Languages

- French — native
- English — fluent (TOEIC C1)

## EDUCATION

**Computer Engineering (MSc)**  
— Polytech Lyon  
2022 – 2025

**Computer Science (two-year technical degree)** — Université Paul Sabatier  
2020 – 2022

**Baccalauréat, Science track (CS specialization)** — Lycée Toulouse-Lautrec  
2017 – 2020

## INTERESTS

- Game development
- Judo — black belt (11 years)
- Travel & cultural discovery
- Cinema

# Florian Geangoult

Computer engineer (MSc, Polytech Lyon) with 3 years of software development experience through a work-study program. A passionate gamer, I build personal projects in Unity and C#. I am looking for a video game developer role where I can apply my skills in systems architecture, gameplay, networking and AI.

## VIDEO GAME PROJECTS

### Valanya — tactical grid-based MMORPG

Turn-based grid combat, modular data-driven spell system, behavior-tree AI, multiplayer networking.

Unity · C# · Mirror

### NeonForest — farming & life simulation game (in development)

Day/night cycle, NPCs with A\* pathfinding, crafting system, quests and dynamic events.

Unity · C#

### Multiplayer game prototype — student association project (team of 15)

03/2025 – Present

Gameplay development and coordination within a multidisciplinary team.

Unity · C# · Python

### Other games — Bok (narrative game), Memory (Android, published), Ghost Stories (mobile clicker)

Unity · C#

## PROFESSIONAL EXPERIENCE

### Software Developer — Crédit Agricole Technologies et Services (work-study)

09/2022 – 09/2025

Built internal tools to digitize file creation and information management for regional banking branches. Teamwork, Agile methods, and managing several assignments in parallel.

Java · Spring Boot · Python · SQL · Docker

### Developer Intern — IRIT (research institute)

02/2022 – 06/2022

Developed extension modules for the Moodle learning platform.

## OTHER PROJECTS

### Ride-hailing booking app

10/2024 – 05/2025

Java · JavaScript

### User recommendation algorithm

Python

### Medical practice management website

PHP · MySQL
